8 SPECIALIST INDUSTRIES

Syed Star Engineering (Pvt.) Ltd.

Manufacturer and supplier of process machinery, stainless steel tanks and fabricated equipment. Lahore, Pakistan.

01 ABOUT US

ENGINEERING FOR INDUSTRY SINCE 2000

Syed Star Engineering (Pvt.) Ltd. is a Lahore engineering company that manufactures and supplies process machinery, stainless steel tanks and fabricated equipment for beverage, juice, dairy, water treatment, food and pharmaceutical plants.

Our founder, Syed Nazar Hussain Shah, formed the company in 2000 after long experience in engineering and beverage companies. We started as specialists in the beverage industry, supplying machinery to carbonated drink bottlers and juice makers, and over the years added work for the sugar, chemical, paper, dairy and cement industries.

Today we take on any mechanical engineering job, precise or heavy, small scale or large, in our own machine shop and fabrication shop. We also supply complete lines that include machinery from our manufacturing partners, erect the equipment at your plant and supply spare parts after handover.

SPECIALIST INDUSTRIES

02 OUR STORY

FROM BEVERAGE SPECIALIST TO ALL-ROUND ENGINEERING

2000

FOUNDED AS A BEVERAGE SPECIALIST

Syed Nazar Hussain Shah, with long experience in engineering and beverage companies, formed the company to serve the beverage industry.

BEVERAGES

BOTTLERS AND JUICE MAKERS

Machinery supplied to carbonated drink companies such as Coca-Cola, Pepsi-Cola and RC Cola, and to juice companies including Golden, Sunkist and Poly Juice.

GROWTH

NEW INDUSTRIES

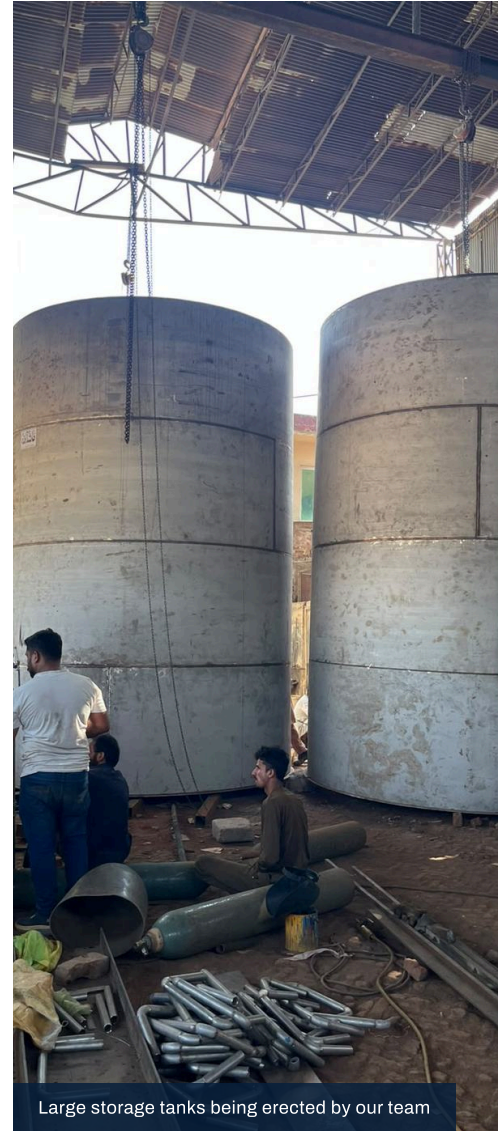

Jobs added for the sugar, chemical, paper, dairy and cement industries.

TODAY

SYED STAR ENGINEERING (PVT.) LTD.

A private limited company ready for any mechanical engineering job, precise or not, small scale or large, in the machine shop or the fabrication shop, for any industry.

Large storage tanks being erected by our team

OUR MISSION

“To fabricate, manufacture and erect precise jobs for any industry, and to develop or acquire technology for new equipment for the chemical process, dairy and allied industries.”

03 WHAT WE DO

FROM DESIGN TO ERECTION, AND SUPPORT AFTER HANDOVER

We take a project from the first requirement study to equipment running at your plant. Equipment is built to your requirement: the capacity, dimensions, connections and fittings are agreed with you and confirmed in the quotation.

01

STUDY & DESIGN

Requirement study and equipment design around your process.

02

FABRICATE & MACHINE

Fabrication and machining in our own Lahore workshop.

03

COMPLETE LINES

Complete lines, including machinery from our manufacturing partners.

04

ERECT & SUPPORT

Erection at your plant and spare parts after handover.

Tank fabrication under our workshop shed

WHY CHOOSE US

SINCE 2000

25+ years building process machinery for Pakistan's beverage, dairy, water and food industries.

LEADING CLIENTS

Nestlé, Coca-Cola Beverages, Pepsi bottlers, Murree Brewery and Pakola are among our named clients.

OUR OWN WORKSHOP

A machine shop and a fabrication shop in Lahore, for precise parts and large stainless steel vessels.

DESIGN TO ERECTION

Machinery we manufacture or supply, matched to your process and installed at your plant by our team.

04 INDUSTRIES WE SERVE

SPECIALIST EQUIPMENT FOR EIGHT INDUSTRIES

Most of our work is for plants that process liquids and food. Through general engineering and fabrication we also serve the sugar, chemical, paper and cement industries.

BEVERAGE & SOFT DRINKS

Water treatment, syrup room, carbonation and bottling equipment for carbonated drink and water plants.

JUICE PLANTS

Pulping, processing, storage, filling and capping equipment for fruit juice production.

DAIRY & MILK PROCESSING

Milk chillers, transport and storage tanks, pasteurizers and plant pipework, from collection centres to processing.

WATER TREATMENT

Reaction tanks, carbon and sand filters, RO plants and storage tanks for water filtration.

PHARMACEUTICAL

Sifting, mixing and blending equipment for solid dosage, plus bottle washing, sealing and labelling for liquids.

KETCHUP & JAM UNITS

Vacuum kettles, holding tanks and bottle filling lines for ketchup, jam and sauces.

MATERIAL HANDLING

Belt conveyors, roller conveyors and packing tables that move product between stages.

GENERAL ENGINEERING & FABRICATION

Fabrication and machine-shop work for any industry, at small or large scale.

05 PRODUCTS

WATER TREATMENT, SYRUP ROOM & CARBONATION

The equipment between raw water and the filler in a soft drink or packaged water plant.

TYPICAL SOFT DRINK PLANT

Water treatment

Syrup room

Carbonation

Bottling

REACTION TANK

Tanks that give water the contact time it needs after chemical dosing.

CARBON & SAND FILTER TANKS

Pressure filter vessels that remove suspended solids, chlorine, odour and colour ahead of RO or process use.

RO WATER TREATMENT PLANT

Frame-mounted reverse osmosis systems that purify water for drinking-water bottling and beverage production.

DOUBLE JACKET SUGAR TANK

Jacketed tanks for dissolving sugar and preparing syrup with indirect heating.

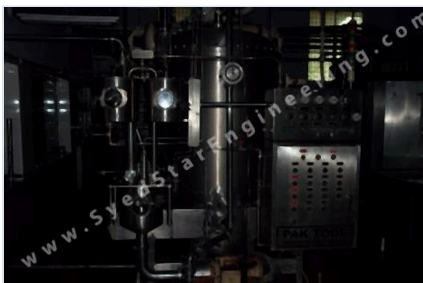

FILTER PRESS

Stainless plate filter presses for clarifying sugar syrup and other process liquids.

SYRUP TANK

Stainless steel tanks for storing and blending syrup in the syrup room.

CARBO COOLER

Carbonation and cooling units that chill the drink and dissolve CO₂ before filling.

SIZED TO YOUR PLANT

Capacity, dimensions, connections and fittings are agreed with you and confirmed in the quotation.

Process plant work by our team

06 PRODUCTS

BOTTLE WASHING, FILLING, CAPPING & PACKING

Rinsing, filling, capping, labelling and packing machinery for bottles, linked by our own conveyors.

TYPICAL BOTTLING LINE

Washing / rinsing

Filling

Capping

Labelling

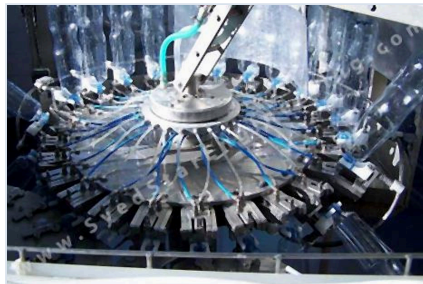

Shrink wrapping

ROTARY BOTTLE WASHING MACHINE

Automatic bottle washers that clean containers before filling.

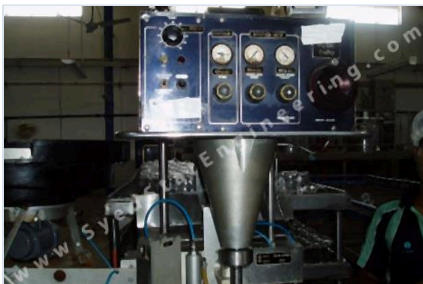

RINSER MACHINE

Rotary rinsers that invert and rinse bottles immediately before filling.

FILLING MACHINE

Rotary multi-valve fillers with stainless steel product bowls for drinks and juices.

CAPPING MACHINE

Rotary cappers that apply and tighten closures on filled bottles.

CAP CHUTE HOPPER

Stainless hoppers and chutes that hold closures in bulk and feed them to the capping machine.

LABELLING MACHINE

Automatic labellers that apply labels to bottles and containers on the packing line.

SHRINK WRAP MACHINE

Heat-shrink tunnels that bundle bottles in film for storage and transport.

BELT & ROLLER CONVEYORS

Stainless belt conveyors, roller conveyors and packing tables that move product between stages.

COMPLETE LINES

We supply complete lines, including machinery from our manufacturing partners, and erect them at your plant.

07 PRODUCTS

JUICE, DAIRY & FOOD PROCESSING

Processing, chilling, storage and filling equipment for juice plants, dairies and ketchup and jam units.

PULPER MACHINE

Fruit pulpers that separate pulp from seeds, skin and fibre at the start of a juice line.

HOMOGENIZER

High-pressure homogenizers that give juices a smooth, stable texture.

STAINLESS STEEL STORAGE TANKS

Vertical stainless tanks for milk, cream, juice and treated water, singly or in rows.

MILK CHILLER

Insulated stainless milk chillers that cool fresh milk at collection centres and farms.

KETCHUP BOTTLE FILLING LINE

Filling lines that dispense ketchup and sauces into bottles.

Dairy plant work by our team

ALSO BUILT TO ORDER

PASTEURIZER

Heat-treatment systems that pasteurise milk and juice for safety and shelf life.

MILK TRANSPORTATION TANK

Insulated stainless tanks for carrying chilled milk from collection centres to the plant.

VACUUM KETTLE

Vacuum kettles for cooking and concentrating ketchup, jam and sauces at lower temperatures.

HOLDING TANK

Tanks that hold cooked ketchup or sauce ready for the filling line.

08 PRODUCTS

PHARMACEUTICAL MACHINERY

Sifting, mixing and blending equipment for solid dosage, plus bottle washing, sealing and labelling for liquids.

POWDERS & GRANULES

LIQUID PACKAGING

VIBRO SIFTER

Vibratory sifters that screen and grade powders and granules for tableting.

MASS MIXER

Mixers that combine powders with binder liquid into a uniform wet mass for granulation.

DOUBLE CONE BLENDER

Rotating double-cone blenders for gentle, uniform mixing of powders and granules.

DRUM BLENDER

Rotating drum blenders for mixing larger batches of dry powders and granules.

ROPP CAP SEALING MACHINE

Roll-on pilfer-proof (ROPP) sealers that form tamper-evident aluminium caps onto bottles.

FOR LIQUID LINES TOO

Our rotary bottle washing and labelling machines (page 08) also serve pharmaceutical liquid packaging.

09 ENGINEERING & FABRICATION

TANKS, VESSELS & FABRICATION

Stainless steel vessels, pipework and pumps from our fabrication shop, and machine-shop work for any industry.

LIMPET COIL TRIPLE JACKET TANK

Agitated process vessels with limpet-coil jackets for heating or cooling product.

PROCESS PIPELINES

Stainless steel process piping, manifolds and valve panels that connect tanks and machines.

STAINLESS STEEL PUMPS

High- and low-pressure stainless steel pumps for water, syrup and beverages.

FIELD OF OPERATION

We design, fabricate, manufacture and erect equipment such as:

Rolled tank shells in our fabrication shop

✓ Chemical reactors

✓ Tanks

✓ Absorption & distillation columns

✓ Heat exchangers

✓ Boilers

✓ Sterilizers

✓ Furnaces

✓ Filters

✓ Centrifuges

✓ Evaporators

✓ De-aerators

✓ Packed plate columns

✓ Absorption equipment

✓ Heaters

✓ Pumps

✓ Compressors

✓ Fans & blowers

✓ Turbines

✓ Valves & control valves

✓ Agitators & drives

✓ Crushing & grinding equipment

✓ Refrigeration & cooling towers

✓ Spare parts for the above

10 RECENT WORK

FROM OUR WORKSHOP TO YOUR PLANT

Recent jobs from our Lahore workshop: storage tanks, filling and packing machines, pipework and heavy fabrication.
